

Michael DeVito II

(856) 238-8719 | mdevitoui04@gmail.com | www.linkedin.com/in/michael-devito-ii

To utilize my exceptional work ethic from Chick-fil-A, my strong educational background with an associate's degree, and my education at Messiah University in an internship setting to extend my experience and knowledge in the Cybersecurity field.

EDUCATION

Bachelor of Science | **Cybersecurity** | Messiah University
Minor | Web Development

August 2024 - May 2027

Associates of Arts | **Liberal Arts** | Rowan College of South Jersey

September 2020 - May 2024

CERTIFICATIONS

CompTIA **Security+** SY0-701

April 2026

CompTIA **Linux+** XK0-005

December 2025

CompTIA **Network+** N10-009

December 2025

WORK EXPERIENCE

Cybersecurity Lab Student Technician | Messiah University

January 2026 - Present

- Services a Proxmox server cluster, a Synology NAS, and Ubiquiti networking hardware
- Performs maintenance on Proxmox cluster and manages virtualized networks for enhanced efficiency
- Applies cybersecurity principles including least privilege, segmentation, and out-of-band management
- Documents network infrastructure and implements new firewall rules and VLAN configurations

Security Operations Center (SOC) Team Lead | Messiah University

August 2025 - Present

- Leads two shifts per week, ensuring effective team coordination and incident detection
- Instructs new interns during onboarding, facilitating their understanding of software and protocols
- Escalates incident reports and generates shift reports to maintain accountability and foster team growth
- Utilizes Graylog and Cortex for advanced log analysis; creates phishing campaigns with GoPhish

SKILLS

Incident Response | System Administration | Networking | Linux | Ubuntu Server | Windows | Active Directory | Proxmox VE | VMware | VirtualBox | Docker | Graylog | Cortex | GoPhish | FTKImager | Guacamole | Office 365

COMPETITIONS

Mid-Atlantic Collegiate Cyber Security Competition (MACCDC)

March 2026

- Led the Linux team through hardening and proper configuration of vulnerable virtual machines
- Diagnosed a system with malware and completed proper incident response procedures
- Finished in 4th place as the only Division III school competing in regionals

National Cyber League Competition

November 2025

- Competed on an 8-person team in a capture-the-flag (CTF) competition
- Performed log analysis, password cracking, cryptography, and web application exploitation
- Finished in the top 5% of teams nationwide

PROJECTS

Proxmox Homelab

Established 2024

- Maintains two-node Proxmox cluster built entirely from scratch
- Secures private media server and password manager for family use
- Provides public-facing services such as Minecraft server and Discord bot application

Linux Server Build Group Project

Fall 2025

- Administered an Ubuntu Web Server and developed comprehensive documentation
- Enforced role-based access control and principle of least privilege for security
